Our History:

Since 1975 Our Family has Camped and paddled the lakes and rivers of Algonquin Park. We have used just about every type of Canoe made to travel the interior of Algonquin over the years. We have been selling Fiberglass canoes to other enthusiasts since 1976. Our over 30 years of experience has led us to design a canoe that is the lightest in each category that can be made while retaining the maximum strength in the hull. So, they are not necessarily the lightest canoes made, that was not our goal. You also need a tough canoe that will last for many years. . So the combination of the right materials in the right places, the latest construction methods, and the reinforcement necessary to survive for years at the cottage or traveling the wilderness of Canada has resulted in one of the best value yet strongest durable canoes made today. (of course still Built in Canada.)
