Our Fiberglass Hand Laid Squareback models

Our **15' Square Back.** It is a great canoe for you hunters and fishermen. One of the reasons is that you can mount a small motor on the back of it. When the motor is on it makes it easier to get to those secret fishing holes and to return home when the canoe is full of game. We recommend that you use 1 to 2.5 hp motor that can be gas or electric to propel your canoe. note:this model is hand laid fiberglass.

WEIGHT - 70 lbs; BEAM- 40", DEPTH - 14"; CAPACITY - 850 lbs.
Fiberglass \$1295.00
